SUMMARY

Java Full Stack Developer with hands-on experience in Java, Spring Boot, REST APIs, SQL, React.js, and React Native. Experienced in developing secure backend services, integrating APIs, and working with microservice-based applications.

WORK EXPERIENCE

Software Developer

IKRGY Infotech Pvt. Ltd

04/2026 – Present
Hyderabad, Telangana

- Developed backend services using Java and Spring Boot.
- Built and integrated RESTful APIs with frontend applications.
- Implemented Spring Security, JWT authentication, and RBAC.
- Working with PostgreSQL and microservice-based architecture for backend development and service integration.

TECHNICAL SKILLS

Languages — Java, Python, JavaScript, SQL

Frontend — HTML5, CSS3, React.js

Backend — Spring, Spring Boot, FastAPI, Rest APIs, Microservices

Database & Caching — postgresSQL, Redis

ORM & Security — Hibernate, JDBC, JWT

Tools & Technologies — Docker

Testing — Manual Testing, Automation Teting

EDUCATION

B.Sc. Chemistry

Government Arts and Science College

2021 – 2024
Sivakasi

CERTIFICATIONS

Java Full Stack Developer Certificate — Besant Technologies

PROJECTS

Smart Blood Search, Donation & Tracking Management System - In Progress

08/2026

Role-based platform for blood requests, donor matching, donation management, and real-time donor tracking.

Technologies: Java, Spring Boot, Microservices, Spring Security, JWT, RabbitMQ, PostgreSQL, React.js, React Native

- Developing a role-based blood donation platform supporting Super Admin, Platform Admin, Main Hospital Admin, Branch Hospital Admin, and Hospital Staff with hierarchical access control.

- Implementing secure authentication and authorization using Spring Security, JWT, password hashing, mobile OTP verification, and role-based access control (RBAC).
- Developing Spring Boot microservices and RESTful APIs with PostgreSQL, including request validation, exception handling, and structured service-layer architecture.
- Implementing RabbitMQ-based asynchronous communication between authentication and notification services to decouple notification processing from core business operations.
- Building React.js web applications for Super Admin, Platform Admin, and hospital administration, along with React Native mobile applications for Donor and Hospital Staff workflows.

Integrated College / University Management System

Scalable Academic & Administrative Management System

Technologies : Python, FastAPI , SQLAlchemy, PostgreSQL, Redis, Celery, Pydantic, Casbin, JWT, Microservices.

- Developed and maintained RESTful backend APIs using Python and FastAPI.
- Implemented business logic, validation, and service-layer functionality for enterprise workflows.
- Implemented role-based and attribute-based authorization using Casbin.
- Contributed to a modular microservices architecture for scalable backend services.
